ILLINOIS RAILROADS: THEN AND NOW

The purpose of the effort it to provide a listing of each railroad line in the State of Illinois in a format to summarize the line's history, location and historical details. The volume is broken down in eight Chapters for the purpose of cross-reference.

Chapter 1

Is the listing of the individual steam/diesel rail line, documenting its corporate history with the date reflecting either the date of incorporation or assuming control, or any related pertinent details. The list of stations also indicates that county in which it is located and mileage is from point of origination. The railroad crossing in most cases is the point where another railroad crosses at grade, elevated or subway or connects to the respective line. The miscellaneous box list any abandonment's, trackage rights (grant to or from) spur tracks or pertinent information

Chapter 2

Is the listing of individual interurban and street railway outlined as listed in Chapter 1.

Chapter 3

This is a list of non-functional railroads which were charted by the state to be built, and either failed to complete the construction of the line or was never built

Chapter 4

Is the alphabetic listing of all stations with respective county listed. The company initials and route of the railroad is referenced to the index which identifies the page number of respective rail line.

Chapter 5

Is the alphabetic listing of all counties with respective city listed. The railroad crossing in most cases is the point where another railroad crosses at grade, elevated or subway or connects to the respective line. The company initials and route of the railroad is referenced to the index which identifies the page number of respective rail line.

Chapter 6

An alphabetic listing of all operating corporations. The company initials and route of the railroad is referenced to the index which identifies the page number of respective line..

Chapter 7

This is the total alphabetic compilation of corporations; both functional and non-functional. The functional lines will list the company initials and route and is referenced to the index which identifies the page number of respective line. The non-functional lines will be listed as such and refer to Chapter 3 for additional details.

Chapter 8

This chapter is the chronological listing of functioning railroad lines. The company initials and route is referenced to the index which identifies the page number of respective line.
